

4.4-4.5

Proofs: SSS & SAS

Given: D is the midpoint of \overline{AC} ,

$$\overline{AB} \cong \overline{CB}$$

Prove: $\triangle ABD \cong \triangle CBD$

Statements	Reasons

Given: $\overline{RQ} \cong \overline{TQ}$,
 \overline{QS} bisects $\angle RQT$

Prove: $\triangle RQS \cong \triangle TQS$

Statements	Reasons
